CARRER OBJECTIVE

Aspiring software developer passionate about creating AI-driven and data-centric solutions eager to contribute innovative ideas and grow within a dynamic tech environment.

EDUCATION:

Vikrant Institute Of Technology & Management, Gwalior (2022–2026)
Bachelor of Technology in Computer Science Engineering

St. Convent Higher Secondary School
12th | 66%

Navyug Children Higher Secondary School
10th | 70%

SKILLS:

- **Programming:** Python, ML, JavaScript, SQL, React.js
 - **Web Technologies:** HTML, CSS, Leaflet.js
 - **Tools & Platforms:** GitHub, VS Code
 - **Core CS:** Data Structures & Algorithms
 - **Soft Skills:** Good Communication, Management Skills
-

WORKSHIP EXPERIENCE:

Internship Experience
Cod-Soft – Python Development Intern
Duration: 1 Month

- Completed 4 Python projects focusing on logic building and application development.
 - Gained hands-on experience in data handling, automation, and problem-solving.
 - Improved code efficiency by applying modular programming and debugging techniques.
 - Strengthened teamwork and real-world project exposure in a fast-paced environment.
-

PROJECTS:

1) AI-powered Resume Screening System

[<https://github.com/Gauravsharma-eng / AI-powered Resume Screening System .git>]

Description

- Built an AI-based system to rank resumes using Python and Machine Learning.
- Used NLP and similarity matching to compare resumes with job descriptions.
- Automated the shortlisting process, improving screening speed and accuracy.

2) Breast Cancer Detection System

[<https://github.com/Gauravsharma-eng/Breast-Cancer-Detection-System.git>]

Description

- Built a real-time breast cancer tumor detection system using YOLOv5 deep learning model.
- Trained and tested on medical imaging datasets to classify tumors as benign or malignant.
- Integrated the model with a Flask web app and Streamlit UI for interactive visualization and predictions.

3) Travel Tracking Website

[<https://github.com/Gauravsharma-eng/Travel-Tracking-Website-System.git>]

Description

- Developed a responsive travel tracking website using HTML, CSS, JavaScript, and Leaflet.js API.
- Enabled users to log and view travel history with map-based destination markers.
- Displayed dynamic famous places and images for each visited city and country interactively.

CERTIFICATIONS:

- Data visualization –TATA
- Data analytics – ACCENTURE
- Data analytics job simulation —DELOITTE
- AI and Data Scientist – ONEROADMAP
- DevOps Engineer – ONEROADMAP
- Software engineering job simulation— ELECTRONIC ARTS

HOBBIES/INTEREST:

- Playing Cricket (teamwork, strategy, and leadership skills)
- Singing (creativity and confidence building)
- Traveling and exploring new places & cultures
- Reading Hindu Mythology (develops focus, values, and knowledge of culture)
